F) Several countries have introduced policies and funding programs aimed at promoting continuous education and skills upgrading among their adult populations.

G) Despite widespread recognition of its importance, many individuals still face practical barriers to pursuing lifelong learning, with the high cost of courses being the most commonly cited reason.

Section C 仔细阅读（单项选择）

The rapid development of artificial intelligence has led to heated discussions about its effects on the job market. Some analysts predict that AI will cause massive unemployment, as machines take over tasks previously performed by human workers. Others take a more optimistic view, arguing that technological progress has always created new types of jobs even as it eliminates old ones.

Historical evidence supports both sides of this argument. The Industrial Revolution did eliminate many traditional crafts, but it also gave rise to entirely new industries and professions. Factory workers, railway engineers, and telegraph operators were all new job categories that did not exist before industrialization. More recently, the rise of the internet eliminated some jobs, such as travel agents and print journalists, while creating millions of positions in software development, digital marketing, and e-commerce.

However, many economists warn that the current wave of AI-driven automation is different from previous technological shifts in one crucial aspect: its speed and scope. Unlike earlier technologies that primarily affected manual labor, AI is capable of performing cognitive tasks that were once thought to require human intelligence. This includes analyzing legal documents, writing reports, translating languages, and even composing music. The range of affected occupations is therefore much broader than in any previous technological revolution.

The appropriate response to this challenge is not to resist technological progress but to adapt to it. Governments, businesses, and educational institutions need to work together to prepare the workforce for the changes ahead. This includes updating school curricula, providing retraining programs for workers in affected industries, and strengthening social safety nets for those who need time to transition to new careers. As one expert puts it, the goal should not be to protect jobs but to protect workers.

46. What is the main topic of this passage?

- A) The history of the Industrial Revolution in Europe
- B) The debate over the impact of AI on employment
- C) The development of new computer technologies
- D) The importance of traditional manual labor skills

47. According to the passage, what do some experts fear about AI?

- A) It will have no noticeable effect on employment
- B) It will only affect low-skilled physical labor
- C) It will create more jobs than it eliminates
- D) It will cause large-scale job losses across sectors

48. What point does the author make about the Industrial Revolution?

- A) It completely destroyed the labor market
- B) It transformed rather than destroyed labor markets

- C) It had almost no impact on employment patterns
- D) It only affected traditional craft industries

49. What makes the current wave of automation different from previous ones?

- A) It develops much more slowly than past technologies
- B) It mainly affects physical labor-intensive industries
- C) It can automate cognitive tasks previously done by humans
- D) It is limited to a small number of specific industries

50. What approach does the author recommend for dealing with AI's impact?

- A) Slowing down the development of AI technology
- B) Protecting existing jobs from automation at all costs
- C) Adapting through education and retraining programs
- D) Letting market forces determine the outcome naturally

Part IV Translation (30 minutes)

Directions: Translate the following passage from Chinese into English.

近年来，随着互联网技术的快速发展，在线教育已经成为一种重要的学习方式。越来越多的学生选择通过在线平台学习英语和其他科目。在线教育的优势在于灵活性和便利性，学生可以根据自己的时间安排学习。然而，在线教育也面临着一些挑战，比如如何保持学生的学习积极性和参与度。许多教育专家认为，未来的教育将是线上和线下相结合的混合模式。

Section C: 46. B 47. D 48. B 49. C 50. C

Part I Writing - Reference Essay

Physical exercise plays a vital role in maintaining both our physical and mental well-being. Regular exercise strengthens our heart and lungs, helps control body weight, and reduces the risk of many chronic diseases. Beyond the physical benefits, exercise is also a powerful tool for managing stress and improving mood. When we exercise, our body releases endorphins, which naturally lift our spirits and help fight anxiety and depression. To make exercise a habit, we should choose activities we genuinely enjoy, whether it is jogging, swimming, or playing team sports. Setting realistic goals and finding a workout partner can also help us stay motivated. In conclusion, making time for regular physical activity is an investment in our long-term health and happiness.

Part IV Translation - Reference

In recent years, with the rapid development of internet technology, online education has become an important way of learning. More and more students choose to learn English and other subjects through online platforms. The advantages of online education lie in its flexibility and convenience, as students can arrange their study according to their own schedules. However, online education also faces some challenges, such as how to maintain students' learning motivation and engagement. Many education experts believe that the future of education will be a blended model combining online and offline learning.
